

PRITHAK DAS

+91-9674969881 | prithakpdas@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#) | Kolkata, India

PROFESSIONAL SUMMARY

Cybersecurity professional with hands-on experience in penetration testing, vulnerability assessment, network security, and threat analysis. Skilled in web application security (OWASP Top 10), SIEM concepts, cloud security, and Python-based security automation. M.Sc. graduate in Advanced Networking & Cyber Security with a CGPA of 8.98/10. Certified in AZ-900, CLLMSP, CLFP and CRTOM, ranked in the top 3% on TryHackMe, and actively participates in CTF competitions, achieving top finishes in national and international cybersecurity challenges.

EDUCATION

M.Sc. – Advanced Networking and Cyber Security | Brainware University, Kolkata . CGPA: 8.98/10 | 2024 – 2026

Bachelor's Degree | R.D. National College, Mumbai.

CGPA: 7.28/10 | 2020 – 2023

WORK EXPERIENCE

Cybersecurity Intern | Unified Mentor Pvt. Ltd. (Remote)

Feb 2026 – Aug 2026

- Developed and submitted cybersecurity-focused projects including a Web Intrusion Detection System, malicious PDF analysis toolkit, and a rule-based and behavior-based Window process monitoring agent using Python and Flask.

Vulnerability Assessment & Penetration Testing (VAPT) Intern | Brainware University

May 2026 – Present

- Performed security testing on a controlled demo web application environment to identify unintended redirections and navigation-related security issues across multiple webpages.
- Conducted web application reconnaissance using Gobuster and analysed HTTP requests and responses with Burp Suite to identify security weaknesses and document findings.

Cybersecurity Virtual Programs | Deloitte, Mastercard, AIG, TCS (Forage)

- Completed cybersecurity job simulations focused on threat analysis, vulnerability assessment, IAM, phishing awareness, incident response, and risk management.

ACHIEVEMENTS

- First Runner-Up – BrainCON CTF 2026**, solved challenges in web exploitation, cryptography, steganography, and digital forensics.
- International CTF Competitor:** SecLeaf Q2 CTF 2026 (**184/1034, Top 18%**), BroncoCTF 2026 (**129/1016, Top 13%**), THEM?! CTF 2026 (**151/905, Top 17%**), and boroCTF 2026 Open Division (**89/645, Top 14%**), demonstrating skills in Web Security, Cryptography, OSINT, Misc, Digital Forensics, and Steganography.

PROJECTS

ShadowMap – AI-Driven Attack Surface Intelligence Platform |

- Built an AI-integrated GUI for Nmap that performs real-time CVE mapping based on service versions, delivers intelligent security insights.
- Integrated multi-source OSINT enrichment along with domain & subdomain enumeration, enabling deep reconnaissance and structured assets discovery with reputation profiling.

SentinelShield – Web Intrusion Detection System |

- Built a Python/Flask-based real-time IDS to detect SQLi, XSS, Directory Traversal, LFI, and Command Injection attacks by parsing incoming HTTP requests.

Multi-Protocol Enterprise Network Design |

- Designed a scalable enterprise network using OSPF (multi-area, Stub/NSSA), EIGRP (MD5 auth, unequal load balancing), and route redistribution across dual AS environments.

CI/CD Pipeline – GitHub Actions & Azure App Service |

- Automated deployment pipeline for a .NET application with secure secrets management, environment configuration, and production monitoring via GitHub Actions and Azure.

Password Checker Web Application |

- Developed a Flask-based password strength evaluator with real-time feedback, secure non-storage handling, and cross-platform support.

Linux Privilege Escalation Toolkit |

- Developed a modular Python-based Linux Privilege Escalation Toolkit that automates system enumeration and identify common privilege escalation vectors with HTML and JSON reporting.

Windows Service & Process Monitoring Agent |

- Developed a Python-based host monitoring agent that tracks system processes and services in real time, using behavioral and rule-based detection to identify suspicious activities and generate structured alerts and reports.

Phishing Simulation & Awareness Project |

- Build a phishing simulation platform featuring a realistic authentication page, automated credential capture, and post-simulation awareness in a controlled environment.

PDF Malware Analysis Toolkit |

- Engineered a static PDF analysis framework to identify malicious behaviors such as embedded scripts, obfuscation techniques, and network indicators with risk-based threat classification.

TECHNICAL SKILLS

Penetration Testing: Metasploit, Burp Suite, Nmap, Nikto, ExploitDB; SQLi, XSS, LFI, Command Injection, Directory Traversal

Vulnerability Assessment: Nessus, OpenVAS, CVE analysis

Networking Protocols: OSPF, EIGRP, Static Routing, Route Redistribution, Switching, ARP, TCP/IP

Forensics & Analysis: Wireshark, Autopsy, SleuthKit

Password Attacks: Hashcat, John the Ripper, Hydra, Medusa

Cloud & DevOps: Microsoft Azure (AZ-900), AWS, GitHub Actions, Azure App Service

Programming: Python, Flask

OS & Administration: Linux, Windows Server

CERTIFICATIONS

AZ-900 Microsoft Azure Fundamentals | Certified Red Team Operations Management (CRTOM) | Certified LLM Security Professional (CLLMSP) | Certified LLM Security Expert (CLLMSE) | Certified Linux Fundamentals Practitioner (CLFP) | Cisco Networking Basics | Cisco Network Addressing & Basic Troubleshooting | Certified SOC Analyst Fundamentals (CSOCF)

SECURITY LABS & CTF

- Ranked **Top 3% on TryHackMe**; completed labs in web exploitation, malware analysis, and defensive security.
- Solved Hack The Box challenges focused on enumeration, privilege escalation, and exploitation techniques
- Participated in college-level and online national-level Capture The Flag (CTF) competitions involving web security, OSINT, cryptography, forensics, and related cybersecurity challenges.
- Participated in national-level hackathon **HackOrbit 2026**, presenting and showcasing the functionality of **ShadowMap**.
