PRITHAK DAS

VAPT Analyst

+91-9674969881 | prithakpdas@gmail.com | Portfolio | LinkedIn | GitHub | Kolkata, India

PROFESSIONAL SUMMARY

Cybersecurity professional specializing in web application penetration testing, vulnerability assessment (VAPT), and network security. Currently working as a **VAPT Analyst at Brainware University**, delivering client security assessments, reconnaissance, vulnerability identification, reporting, and retesting. Holds **Web-RTA, AD-RTS, and AZ-900** certifications, with a **Top 2% TryHackMe ranking** and experience competing in national and international CTFs.

WORK EXPERIENCE

VAPT Intern | *Brainware University* **May 2026 – Present**

- Conducted VAPT of client web applications to identify vulnerabilities, security weaknesses, and potential attack vectors.
- Performed reconnaissance, directory/content enumeration, and manual security testing using **Nmap, Gobuster, Burp Suite, and Nuclei.**
- Developed VAPT methodologies, documented findings with evidence and impact, prepared client reports, and performed vulnerability retesting.

Independent Security Research **October 2026**

- Independently identified potential WordPress security vulnerabilities and submitted a responsible disclosure report with supporting evidence and remediation recommendations to St. Aloysius High School, Nallasopara East.

Cybersecurity Intern | *Unified Mentor Pvt. Ltd. (Remote)* **Feb 2026 – Aug 2026**

- Developed and delivered four cybersecurity projects: a Web Intrusion Detection System, a malicious PDF analysis toolkit, Linux PrivEsc Toolkit, and a rule-based/behavior-based Windows process monitoring agent, built with Python and Flask.

TECHNICAL SKILLS

Penetration Testing: Metasploit, Burp Suite, Nmap, Nikto, ExploitDB; SQLi, XSS, LFI, Command Injection, Directory Traversal
Vulnerability Assessment: Nessus, OpenVAS, CVE Analysis
Networking Protocols: OSPF, EIGRP, Static Routing, Route Redistribution, Switching, ARP, TCP/IP
Forensics & Analysis: Wireshark, Autopsy, SleuthKit
Password Attacks: Hashcat, John the Ripper, Hydra, Medusa
Cloud & DevOps: Microsoft Azure (AZ-900), AWS, GitHub Actions, Azure App Service
Programming: Python, Flask
OS & Administration: Linux, Windows Server

PROJECTS

ShadowMap – AI-Driven Attack Surface Intelligence Platform: Built an AI-integrated Nmap GUI with real-time CVE mapping, multi-source OSINT enrichment, and domain/subdomain enumeration for intelligent reconnaissance and asset discovery.

SentinelShield – Web Intrusion Detection System: Built a Python/Flask-based real-time IDS to detect SQLi, XSS, Directory Traversal, LFI, and Command Injection attacks by parsing incoming HTTP requests.

Linux Privilege Escalation Toolkit: Built a modular Python toolkit automating system enumeration and identification of common privilege escalation vectors, with HTML and JSON reporting.

PDF Malware Analysis Toolkit: Engineered a static PDF analysis framework identifying malicious behaviors such as embedded scripts, obfuscation techniques, and network indicators, with risk-based threat classification.

CERTIFICATIONS

AZ-900: Microsoft Azure Fundamentals | Web-RTA | AD-RTS | CRTOM | C3SA

ACHIEVEMENTS

First Runner-Up – BrainCON CTF 2026; **Ranked 72st nationally** in the 2026 CTF rankings (Syntax Terror CTF Team) with consistent Top 15% finishes across four international CTF competitions.

Secured 7th Place in the EC-Council Hackerverse CTF 2026 with a perfect 2000/2000 score.

EDUCATION

M.Sc. – Advanced Networking and Cyber Security **2024 – 2026**

Brainware University, Kolkata | CGPA: 8.98/10
